Name: Madhavi Suratkar

**Topic: Shell Script** 

Date: 20-04-2023

Q) Write a shell script that consists of a function that displays the number of files in the present working directory. Name this function "file\_count" and call it in your script. If you use variable in your function, remember to make it a local variable

### Q) For each directory in the \$PATH, display the number of executable in that directory

# Q) Display the names of any file-system which have less than 10% free space available

Q) Write a script that takes any number of directories as command-line arguments and then lists the contents of each of these directories
